Public asked to help decide which local transportation projects to fund

Residents of Greater Des Moines are invited to share their opinions on which local transportation projects they would like to see receive funding from the Des Moines Area Metropolitan Planning Organization (MPO).

Nineteen projects are under consideration, ranging from roadways, bridges and transit buses to trails, safe routes to school and on-street facilities. More than $34 million has been requested from the Surface Transportation Block Grant Program, as well as the Surface Transportation Block Grant Set-Aside Program, which combined have an approximately $13 million in available funding. Both grant programs are funded by the U.S. Department of Transportation and administered by the MPO.

The public can find project descriptions and an interactive map of the 19 projects online at [www.dmampo.org/public-participation/](http://www.dmampo.org/public-participation/) and leave comments on the site now through Friday, March 27. Comments can also be shared at a public meeting from 4:30 to 6 p.m. Tuesday, March 24, at the MPO office, 420 Watson Powell, Jr. Way, Suite 200, Des Moines, IA 50309.

The MPO also scores the projects on how well they help meet the regional performance measures established in Mobilizing Tomorrow, the region’s recently updated long-range transportation plan ([dmampo.org/mobilizing-tomorrow/](http://dmampo.org/mobilizing-tomorrow/)). The scores and public comments will be presented to a funding subcommittee of local officials, who will make a funding recommendation. The recommendation will be presented to the MPO Policy Committee in April for review and again in May for final approval. Once awarded, the grants will be allocated in federal fiscal year 2024.

For more information on the projects, please call or email MPO staff at 515-334-0075 or [info@dmampo.org](mailto:info@dmampo.org).

The Des Moines Area Metropolitan Planning Organization (MPO) acts as a regional forum to ensure coordination between the public and local, state, and federal agencies in regard to planning issues and to prepare transportation plans and programs. The MPO develops both long- and short-range multimodal transportation plans, selects and approves projects for federal funding based upon regional priorities, and develops methods to reduce traffic congestion.
